Mentoring Program

Question: What mentoring ideas exist so that new teachers do not fall through the cracks?

Summary of Findings: In more than half of the states, a mentoring program is mandated. In other places, such as Chicago, individual districts have established formal mentoring programs. There are numerous new teacher induction programs that have been instituted between school districts and universities, such as with the University of Cincinnati. Formal mentoring programs that are part of a school’s culture are more successful than those that are informal and unstructured. Each school must establish a mentoring program that best meets the needs of their new hires and the culture of the school. The purposes of a mentoring program should: encourage exemplary teachers to grow professionally; be a way to retain experienced and new teachers; and support new and mentor teachers to elevate student achievement because there are competent educators in the classrooms.

Major Findings and Conclusions:

Definitions of mentor teacher programs:
• “…Nurturing the professional growth of a new colleague” (New York City’s Mentor Teacher Internship Program)
• “Mentor programs help beginning teachers make a successful transition into teaching by relying on the expertise of veterans to provide a clinical, real-world training process. Districts that provide effective support attract the most capable candidates, who remain on the job and improve student performance” (Guidelines for Mentor Teacher Programs, VA)
• Provide assistance and guidance to inexperienced teachers to “maximize effectiveness” (Supporting Beginning Teachers) in the classroom.

Ideas for mentoring
Provide:
• A protégé with an experienced and willing teacher in the same subject/content area
• Release time to observe new teacher and mentor
• Common release time so the mentor and mentee may have one-on-one & small group conversations
• No more than three inexperienced teachers with whom one mentor will work
• Personal invitations to new staff members to lunch and events at school (i.e. sports, theater, concerts, etc.)
• Introductions of new teachers to existing staff members, including secretaries and custodians
• A real tour of the school (i.e. restrooms, cafeteria, where not to sit in the lunchroom, etc.)
• Assistance about where and how to locate materials to use in the classroom
• Ways in which others can share materials with the new teachers
• On-going formal programs and orientations for things like attendance taking, grade reporting, how to get a substitute, ordering supplies and materials, and school policies
Administrative support
  • Connect new teachers with an appropriate exemplary teacher who is willing to be a mentor
  • Develop and support formal programs, orientations and training
  • Fund the program so the mentor and mentee have release time to talk with and observe in each other’s classrooms
  • Provide a stipend for the mentors
  • Assign classes to the new teachers that will be easier to manage, with fewer preparations, and if possible, to courses with which they already have some familiarity
  • Assign new teachers to one classroom that is easily accessible, neat, clean, and in good working condition
  • Make materials for the classroom readily available
  • Make brief drop in visits on a regular basis as a means of support

Mentors should receive
  • A stipend for the position
  • Money for release time to observe and conference, professional growth, materials, & supplies
  • On-going training and a means by which to share information and experiences with other mentors

Considerations prior to implementing a mentor teacher program
  • Who will provide the guidance and direction of and for the program?
  • Who will do the mentoring?
  • Who should receive mentoring?
  • Will participation be voluntary or mandatory?
  • Will the mentors have teaching responsibilities or be full time mentors?
  • What will the expectations be of and for the mentor and protégé?
  • What incentives (i.e. stipends, release time, etc.) will be in place for the mentor and new teachers?
  • What training will mentors need? Who will provide it?
  • What training will newly minted teachers need? How will they receive it?

Online Resources:

  • A Glossary of Induction Terms
    This provides brief definitions for terms used in mentoring and induction programs. Also included is a short list citing reasons why new teachers need to be supported.
